Claims 1-22 are allowed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thakar et al (US Patent No. 6475538) in view of Barz et al (US Patent No. 5200216).

Thakar et al disclose a process for preparing cheese comprising coagulating a dairy substrate, cutting the curd, separating the whey, heating with steam, and further processing to produce cheese (see entire patent, especially claims 1 and 7). Thakar et al also disclose the addition of cream and non-fat dry milk before or during heating (see claim 5). Thakar et al also disclose the addition of starch (see claim 12).

The claim differs as to the steps taking being performed without intermediate freezing, cold storage, or packing (i.e. a continuous process).

Barz et al disclose the conventional continuous processing of cheese (see entire document, especially claim 1).

It is also noted that Thakar et al teach a batch process so that the curd may be stored until needed (see for example the abstract). Certainly, if the need is immediate then the curd would not be stored and the process would be continuous as is claimed.

It would have been obvious, to a person of ordinary skill in the art, at the time the invention was made, to specifically use a continuous process as taught by Barz et al in that of Thakar et al because the use of continuous processes in cheese manufacturing is conventional in the art. The use of batch or continuous processing based upon need and facility limitations. The selection of processing type is well within the skill of the art and absence the showing of unexpected results is merely a matter of choice.

Applicant does not argue the limitations of claim 23.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
